

Inspection Stamp Planning Guide

This starter guide helps quality teams plan inspector IDs, acceptance marks, and traceability stamps before requesting a quote.

Program Structure

Consistent inspection marks help records and marked parts tell the same story.

- Inspector numbers or initials
- Department or work-cell codes
- Acceptance and rework marks
- Lot, shift, or date formats
- Replacement and retirement process

Stamp Format

Format decisions should be documented so reorders match the original program.

- Character height
- Face layout
- Single stamp or set
- Interchangeable holder compatibility
- Symbol, text, or combined mark

Use Conditions

Application details help protect mark quality.

- Part material
- Desired depth
- Operator method
- Part support
- Frequency of use
- Storage and organization

Next Step

Send the program requirements through the quote form or email sales@superiorsteelstamp.com.

- Attach drawings or photos
- Include existing stamp samples if replacing

- List every inspector ID required
- Mention deadline or audit timing

Placeholder PDF: replace with approved photography, final line-card details, certifications, and customer-specific language before public launch.
